

RAMAKRISHNA SONAKAM

MS Data Science (May 2026) | Ex-Amazon

Brooklyn, NY | 646-407-5642 | rsonakam@gmail.com | [LinkedIn](#) | [GitHub](#) | [Medium](#)

EDUCATION

MS, Data Science — Pace University, New York	May 2026
BE, Electronics & Telecommunications — University of Mumbai	June 2021

PROFESSIONAL EXPERIENCE

Senior Associate, Product Compliance & Operations Amazon Development Centre Hyderabad, India	Sept '21 – Aug '24
- Root-caused reinstatement workflow bottlenecks; drove process changes that improved efficiency by 200 bps (~8 analyst-hours/week recovered). - Uncovered systemic error patterns across 1,000+ audits; presented findings to program managers and drove corrective action lifting accuracy from 94% to 100%. - Led cross-functional task force (ops, quality, compliance) to close a monitoring gap — achieved 100% accuracy within 3 weeks, improving senior stakeholder reporting cadence. - Built and delivered onboarding program for 15+ analysts and managers; quality-check framework adopted as team standard.	

PROJECTS

LipSyncNet Cross-Domain Generalisation — MS Capstone — <i>Python, PyTorch, CTC, Bi-LSTM, Transformer</i>	2026
- Evaluated a lip-reading model (trained on GRID) against in-the-wild MuViC speech data to measure cross-domain performance degradation — framing the research as a real-world deployment readiness study. - Conducted ablation study across three temporal backends (Bi-LSTM, Bidirectional Transformer, Identity); applied attention-based pooling and sub-word tokenisation, improving out-of-distribution accuracy.	
NYC Traffic Volume & Congestion Analysis — <i>Python, Pandas, Plotly, Scikit-learn</i>	Nov 2025
- Analyzed 1.8M-record dataset to surface congestion patterns by borough and time-of-day; built visualizations for non-technical stakeholders and engineered a congestion-detection feature. - Trained Decision Tree Regressor (96% accuracy) and Random Forest Classifier (95%); documented model trade-offs and business implications.	
Customer Churn Prediction — BCG Virtual Experience — <i>Python, Pandas, Scikit-learn</i>	Nov 2024
Identified key churn drivers from customer behavior data; built Random Forest model (91% accuracy) and delivered executive summary framed around business impact, not model metrics.	
CaterPal Chatbot — Experiential Learning Lab, Pace University — <i>Flask, MongoDB, TF-IDF</i>	Mar 2025
Scoped product requirements and mapped user workflows for a catering platform before implementation; built NLP recommendation logic and presented architecture trade-offs to senior stakeholders.	

TECHNICAL SKILLS

Analytics & Product: Funnel analysis, cohort analysis, A/B testing (conceptual), KPI definition, EDA, Feature Engineering
Tech: Python (Pandas, NumPy, Scikit-learn), SQL, Tableau, Plotly, Matplotlib, MongoDB, Git, Jupyter
